

Olympia iPhone Repair Liquid Damage Policy

There is **ALWAYS** a risk that liquid damaged devices **MAY NOT** be repairable

- Liquid Damage indicators are located inside the charging port and headphone jack as well as inside the device on the logic board
- Liquid Damage indicators turn from white to pink or red when exposed to any type of moisture
- Visible Liquid Damage **DOES** void **ANY** and **ALL** manufacturer warranty as well as Olympia iPhone Repair's 90 day limited warranty
- If **ANY** indicator(s) are pink or red, customer must be informed and shown liquid damage policies
- Visible Liquid damage inside a device may be noted as "Rust, Corrosion, Residue, Moisture, Burn Marks, Spots in LCD Display"
- If no visible liquid damage is noted inside device, Technician may continue with original noted repair
- If liquid damage is noted inside a device, technician will not continue with original noted repair until customer is contacted and further quoted

Un-known issues may present themselves post treatment/repair. Issues can be diagnosed and treated separately and may or may not be repairable

Due to the intense labor involved in treating/testing a liquid damaged device – ALL liquid damage repairs will include a \$50 NON-REFUNDABLE FEE
